Download Appium Desktop

Follow the steps given below to download the latest version of Appium Desktop –

1. Open Appium Desktop's GitHub page – https://github.com/appium/appium-desktop/releases

2. This page lists down all the versions of Appium Desktop. You will have to download the latest version which is shown at the top of the page. The latest version on the website is **v1.6.1** (as on 30 May 2018).

Please Note: New beta versions are released very often. Even if you see a newer version Github, please go ahead and download that version. The steps given in this article would remain the same (only the screenshot contents might change)
3. In the Downloads section of the latest release, you will find different packages for Windows, Mac, Linux etc
